Site Name:  
Date:

NOV 06 1990

GENERAL INFORMATION (continued)

Site Sketch:

(Show all pertinent features; indicate sources and closest targets)

- primary aquifers Magothy Aquifer and Upper Glacial
- no private wells w/in 3-miles
- 8 pumphouses within 3-mile radius serving 14,000 people
- The water comes from the Magothy Aquifer which is the primary source of potable water on Long Island.

NOV 06 1990

## GENERAL INFORMATION

## Site Description and Operational History:

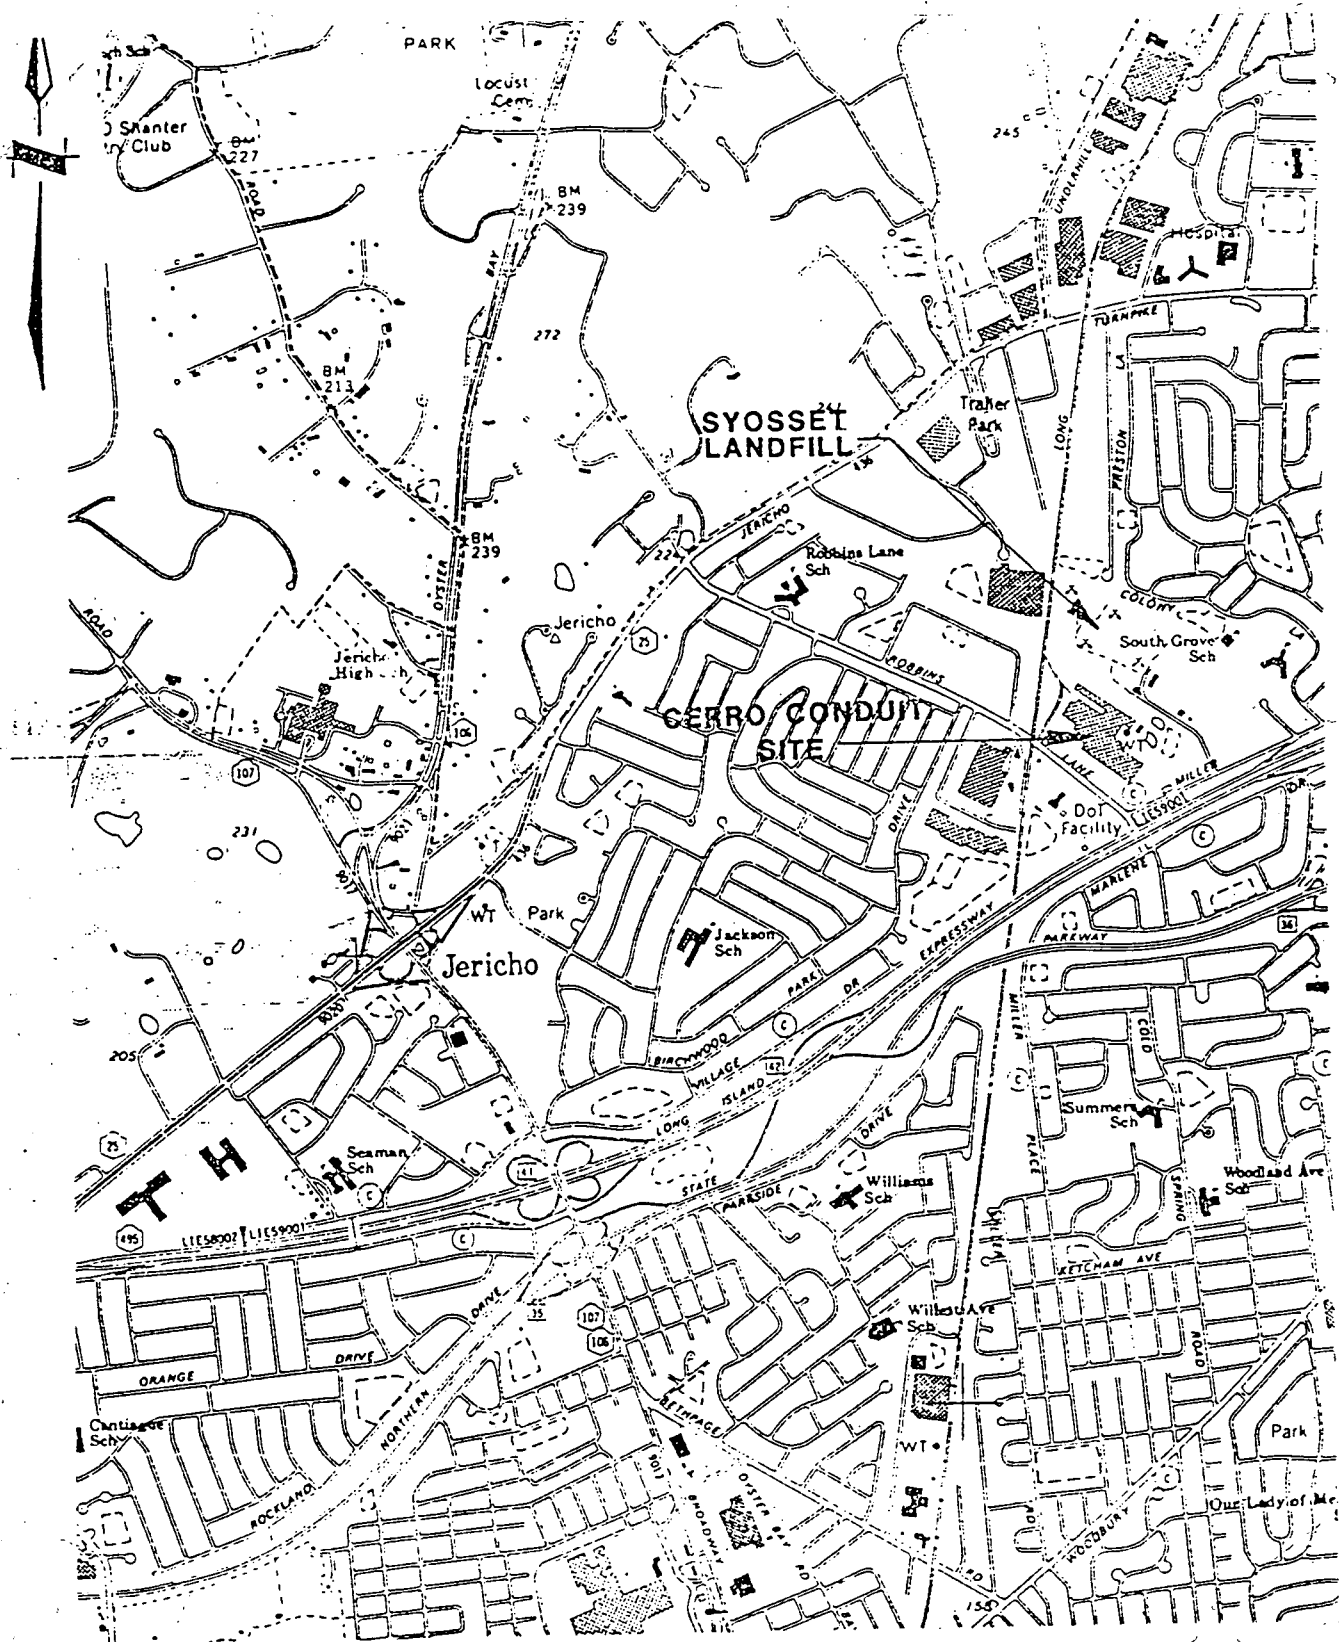

Cerro Wire + Cable Co. in Syosset is an inactive manufacturer of electrical conduit, hot rolled copper rods, and steel strip. Some of the facility operations included caustic cleaning, acid pickling, <sup>and</sup> acid zinc/cyanide electroplating. Wastewater was treated with caustics and chlorine to destroy cyanide and/or ~~cyano~~~~electroplating~~ treated with lime and polymers to complex heavy metals. This wastewater was discharged to clarifiers to allow the precipitation of metal hydroxide sludge. This wastewater was then discharged to Cedar Creek Sewage Treatment Plant. The remaining sludge, determined by EPA to be nonhazardous, has since been removed from the site. A site investigation conducted in 1979 revealed the presence of numerous spills and poorly stored wastes.

Site is <sup>bordered</sup> to the north by the Syosset LF (on NPL) and to the west by LIRR

## Probable Contaminants of Concern:

(Previous investigations; analytical data)

- wastewater/sludge from the use of acids and electroplating
- heavy metals, acids, cyanide

NOV 08 1990

## GENERAL INFORMATION (continued)

## Source Descriptions:

- surface ~~of~~ impoundment of sludges (removed)
- unknown quantity of wastewaters and drums
- calculate waste characteristic on basis of 40 contaminated acres (assumption)

## Waste Characteristics (WC) Calculations:

(See PA Table 1, page 5)

- 40 acres contaminated soil

$$40 \text{ acres} \leq 78 \text{ acres}$$

$$\therefore WC = 18$$

WC =

18

GROUND WATER PATHWAY  
GROUND WATER USE DESCRIPTION

Describe Ground Water Use Within 4-miles of the Site:

(Provide generalized stratigraphy; information on aquifers, municipal, and or private wells)

- aquifers of concern Magothy Aquifer and Upper Glacial
- no private wells w/in 3 miles
- 8 pumphouses in 3 miles serving 14,000 people
- gw flow from site is varying from southwest to northwest
- nearby gw plume from Syosset LF (Syosset LF being investigated under RI/FS)
- depth to gw table 100 ft.
- Groundwater comes from Magothy aquifer
- The Magothy and Lloyd aquifer are separated by the Haritan Clay

Show calculations of ground water drinking water populations:

- 14,000 people served by 8 pumphouses within 3-miles  
 $4,667 \frac{\text{people}}{\text{mile}}$
- estimated < 10,000 people in 3 → 4 mile range

## GROUND WATER PATHWAY CRITERIA LIST

Site Name:

Date:

This chart provides guidelines to assist you in hypothesizing the presence of a suspected release and identifying primary targets. It is expected that not all of this information will be available during the PA. Also, these criteria are not all-inclusive; list any other criteria you use to hypothesize a suspected release or to identify primary targets. This chart will record your professional judgment in evaluating these factors.

The "Suspected Release" section of the chart guides you through evaluation of some site, source, and pathway conditions to help hypothesize whether a release from the site is likely. If a release is suspected, use the "Primary Targets" section to guide you through evaluation of some conditions that will help identify targets likely to be exposed to hazardous substances. You may use this section of the chart more than once depending on the number of targets you feel may be considered "primary." In the "Primary Targets" section on this sheet, record the responses for the well that you feel has the highest probability of being exposed to hazardous substances.

Check the boxes to indicate a "yes", "no", or "unknown" answer to each question. If you check the "Suspected Release" box as "yes", make sure that you assign a Likelihood of Release value of 550 for the pathway.

GROUND WATER PATHWAY			
SUSPECTED RELEASE			PRIMARY TARGETS
Y	N	UNKNOWN	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Are sources poorly contained?
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Is the source a type likely to contribute to ground water contamination (e.g., wet lagoon)?
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Is waste quantity particularly large?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Is precipitation heavy and infiltration rate high?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Is the site located in an area of karst terrain?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Is the subsurface highly permeable or conductive?
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Is drinking water drawn from a shallow aquifer?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Are suspected contaminants highly mobile in ground water?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Does any circumstantial evidence of ground water or drinking water contamination exist?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Other criteria? <u>sampling</u>
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<b>SUSPECTED RELEASE?</b>
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Is any drinking-water well nearby?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Is any nearby drinking-water well closed?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Has foul-tasting or foul-smelling water been reported by any nearby drinking-water users?
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Do any nearby wells have a large drawdown or high production rate?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Are drinking-water wells located between the site and other wells that are suspected to be exposed to hazardous substances?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Does any circumstantial evidence of ground water or drinking water contamination exist?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Does any drinking-water well warrant sampling?
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Other criteria? _____
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<b>PRIMARY TARGET(S) IDENTIFIED?</b>

Summarize the rationale for suspected release (attach an additional page if necessary):

- on-site monitoring wells analyzed gw for TCL metals, volatile organic compounds, and total organics halides.
- only contaminant detected in excessive levels: Fe (minimally above levels) consistent with background levels. This concentration only barely exceeds the limit and is assumed to be naturally occurring.

Summarize the rationale for Primary Targets (attach an additional page if necessary): None.

- no contaminants detected w/ on-site monitoring

~~no other criteria~~

## GROUND WATER PATHWAY SCORESHEET

Pathway Characteristics	
Do you suspect a release (see Ground Water Pathway Criteria List, page 7)?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Is the site located in karst terrain?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Depth to aquifer:	100 ft
Distance to the nearest drinking-water well:	unknown ft

## LIKELIHOOD OF RELEASE

	A Suspected Release (550)	B No Suspected Release (500 or 340)	References
1. SUSPECTED RELEASE: If you suspect a release to ground water (see page 7), assign a score of 550, and use only column A for this pathway.			
2. NO SUSPECTED RELEASE: If you do not suspect a release to ground water, and the site is in karst terrain or the depth to aquifer is 70 feet or less, assign a score of 500; otherwise, assign a score of 340. Use only column B for this pathway.		340	
LR =		340	

## TARGETS

3. PRIMARY TARGET POPULATION: Determine the number of people served by drinking water from wells that you suspect have been exposed to hazardous substances from the site (see Ground Water Pathway Criteria List, page 7). _____ people x 10 =		
4. SECONDARY TARGET POPULATION: Determine the number of people served by drinking water from wells that you do NOT suspect have been exposed to hazardous substances from the site, and assign the total population score from PA Table 2. Are any wells part of a blended system? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> If yes, attach a page to show apportionment calculations.		520
5. NEAREST WELL: If you have identified any Primary Targets for ground water, assign a score of 50; otherwise, assign the highest Nearest Well score from PA Table 2. If no drinking-water wells exist within 4 miles, assign a score of zero.	150, 20, 18, 8, 5, 3, 2 = 01	120, 18, 8, 5, 3, 2 = 01 20
6. WELLHEAD PROTECTION AREA (WHPA): Assign a score of 20 if any portion of a designated WHPA is within 1/4 mile of the site; assign 5 if from 1/4 to 4 miles.	120, 5 = 01	120, 5 = 01 0
7. RESOURCES: A score of 5 is assigned.	151 5	51 5
T =		545

## WASTE CHARACTERISTICS

8. A. If you have identified any Primary Targets for ground water, assign the waste characteristics score calculated on page 4, or a score of 32, whichever is GREATER; do not evaluate part B of this factor.	100 = 32	
B. If you have NOT identified any Primary Targets for ground water, assign the waste characteristics score calculated on page 4.	100, 32 = 18	100, 32 = 18 18
WC =		18

GROUND WATER PATHWAY SCORE:

LR x T x WC

82,500

(subject to a maximum of 100)

# **SURFACE WATER PATHWAY LIKELIHOOD OF RELEASE AND DRINKING WATER THREAT SCORESHEET**

Pathway Characteristics	
Do you suspect a release (see Surface Water Pathway Criteria List, page 11)?	Yes _____ No _____
Distance to surface water:	_____ ft
Flood Frequency:	_____ yrs
What is the downstream distance to the nearest drinking-water intake?	_____ miles
nearest fishery? _____ miles	nearest sensitive environment? _____ miles

## **LIKELIHOOD OF RELEASE**

- SUSPECTED RELEASE:** If you suspect a release to surface water (see page 11), assign a score of 550, and use only column A for this pathway.
- NO SUSPECTED RELEASE:** If you do not suspect a release to surface water, and the distance to surface water is 2,500 feet or less, assign a score of 500; otherwise, assign a score from the table below. Use only column B for this pathway.

Floodplain	Score
Site in annual or 10-yr floodplain	500
Site in 100-yr floodplain	400
Site in 500-yr floodplain	300
Site outside 500-yr floodplain	100

A Suspected Release	B No Suspected Release
(550)	
	(500, 400, 300 or 100)
(550)	(500, 400, 300 or 100)

References \_\_\_\_\_

LR = \_\_\_\_\_

## **DRINKING WATER THREAT TARGETS**

- Determine the water body types, flows (if applicable), and number of people served by all drinking-water intakes within the 15-mile target distance limit. If there are no drinking-water intakes within the target distance limit, assign a total Targets score of 5 at the bottom of this page (Resources only) and proceed to page 14.

Intake Name	Water Body Type	Flow	People Served
_____	_____	_____ cfs	_____
_____	_____	_____ cfs	_____
_____	_____	_____ cfs	_____

- PRIMARY TARGET POPULATION:** If you suspect any drinking-water intake listed above has been exposed to hazardous substances from the site (see Surface Water Pathway Criteria List, page 11), list the intake name(s) and calculate the factor score based on the number of people served.

\_\_\_\_\_ people x 10 = \_\_\_\_\_

- SECONDARY TARGET POPULATION:** Determine the Secondary Target Population score from PA Table 3 based on the populations using drinking-water from intakes that you do NOT suspect have been exposed to hazardous substances from the site.

Are any intakes part of a blended system? Yes \_\_\_\_\_ No \_\_\_\_\_  
If yes, attach a page to show apportionment calculations.

- NEAREST INTAKE:** If you have identified any Primary Targets for the drinking water threat (Factor 4), assign a score of 50; otherwise, assign the Nearest Intake score from PA Table 3. If no drinking-water intake exists within the 15-mile target distance limit, assign a score of zero.

- RESOURCES:** A score of 5 is assigned.

T = \_\_\_\_\_

## ENVIRONMENTAL THREAT TARGETS

11. Determine the water body types and flows (if applicable) for all surface water sensitive environments within the 15-mile target distance limit (see PA Tables 4 and 5). If there are no sensitive environments within the 15-mile target distance limit, assign a Targets score of 0 at the bottom of this page, and proceed to page 17.

Environment Name	Water Body Type	Flow
		cfs
		cfs
		cfs
		cfs
		cfs

12. PRIMARY SENSITIVE ENVIRONMENTS: If you suspect any sensitive environment listed above has been exposed to hazardous substances from the site (see Surface Water Criteria List, page 11), assign a score of 300 and do not evaluate Factor 13. List the Primary Sensitive Environments:

\_\_\_\_\_  
\_\_\_\_\_

13. SECONDARY SENSITIVE ENVIRONMENTS:

- A. For Secondary Sensitive Environments on surface water bodies with flows of 100 cfs or less, assign scores as follows, and do not evaluate part B of this factor:

Flow	Dilution Weight (PA Table 4)	Environment Type and Value (PA Tables 5 and 6)	Total
cfs	x	=	
cfs	x	=	
cfs	x	=	
cfs	x	=	
cfs	x	=	

Sum =

- B. If NO Secondary Sensitive Environments are located on surface water bodies with flows of 100 cfs or less, assign a score of 10.

**DRAFT NOV 06 1990**  
**SOIL EXPOSURE PATHWAY CRITERIA LIST**

Site Name:  
 Date:

This chart provides guidelines to assist you in hypothesizing the presence of a resident population. It is expected that not all of this information will be available during the PA. Also, these criteria are not all-inclusive; list any other criteria you use to hypothesize resident populations. This chart will record your professional judgment in evaluating this factor.

Use the resident population section to guide you through evaluation of some site and source conditions that will help identify targets likely to be exposed to hazardous substances. You may use this section of the chart more than once, depending on the number of nearby people you feel may be considered part of a resident population. Record the responses for the resident population target that you feel has the highest probability of being exposed to hazardous substances.

Check the boxes to indicate a "yes", "no", or "unknown" answer to each question.

SOIL EXPOSURE PATHWAY			
SUSPECTED CONTAMINATION	RESIDENT POPULATION		
	Y •	N •	UNKNOWN •
Surficial contamination is assumed.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	Are there residences, schools, or day care facilities on or within 200 feet of areas of suspected contamination?		
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	Are residences, schools, or day care facilities located on adjacent land previously owned or leased by the site owner/operator?		
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	Is there an overland migration route that might spread hazardous substances near residences, schools, or day care facilities?		
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Are there any reports of adverse health effects from onsite or adjacent residents or students, exclusive of apparent drinking water or air contamination problems?			
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Does any offsite property warrant sampling?			
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Other criteria? _____			
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
RESIDENT POPULATION IDENTIFIED?			

Summarize the rationale for resident population (attach an additional page if necessary):

A resident population is not identified because no homes, schools, or day care facilities are located within 200 feet of the site.

## SOIL EXPOSURE PATHWAY SCORESHEET

## Pathway Characteristics

Do any people live on or within 200 ft of areas of suspected contamination?	Yes	No <input checked="" type="checkbox"/>
Do any people attend school or day care on or within 200 ft of areas of suspected contamination?	Yes	No <input checked="" type="checkbox"/>
Is the facility active? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	If yes, estimate the number of workers: <u>N/A</u>	

## LIKELIHOOD OF EXPOSURE

A	B
Suspected Contamination	No Suspected Contamination
(550)	
LE = 550	

1. SUSPECTED CONTAMINATION: Surficial contamination is assumed.  
A score of 550 is assigned.

LE =

## RESIDENT POPULATION THREAT TARGETS

2. RESIDENT POPULATION: Determine the number of people occupying residences or attending school or day care on or within 200 feet of areas of suspected contamination (see Soil Exposure Pathway Criteria List, page 18).  
0 people x 10 =
3. RESIDENT INDIVIDUAL: If you have identified any Resident Population (Factor 2), assign a score of 50; otherwise, assign a score of 0.
4. WORKERS: Assign a score from the following table based on the total number of workers at the facility and nearby facilities with suspected contamination:

Number of Workers	Score
0	0
1 to 100	5
101 to 1,000	10
> 1,000	15

5. TERRESTRIAL SENSITIVE ENVIRONMENTS: Assign a value from PA Table 7 for each terrestrial sensitive environment that is located on an area of suspected contamination:

Terrestrial Sensitive Environment Type	Value

Sum =

6. RESOURCES: A score of 5 is assigned.

T =

## WASTE CHARACTERISTICS

7. Assign the waste characteristics score calculated on page 4.

WC =

## RESIDENT POPULATION THREAT SCORE:

$$\frac{LE \times T \times WC}{82,500}$$

## NEARBY POPULATION THREAT SCORE:

Assign a score of 2

This chart provides guidelines to assist you in hypothesizing the presence of a suspected release. It is expected that not all of this information will be available during the PA. Also, these criteria are not all-inclusive; list any other criteria you use to hypothesize a suspected release. This chart will record your professional judgment in evaluating this factor.

The "Suspected Release" section of the chart guides you through evaluation of some conditions to help hypothesize whether a release from the site is likely. For the Air Pathway, if a release is suspected, "Primary Targets" are any residents, workers, students, or sensitive environments within 1/4 mile of the site.

Check the boxes to indicate a "yes", "no", or "unknown" answer to each question. If you check the "Suspected Release" box as "yes", make sure that you assign a Likelihood of Release value of 550 for the pathway.

AIR PATHWAY			
SUSPECTED RELEASE		PRIMARY TARGETS	
Y •	N •	UNKNOWN •	
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Have odors been reported?		<p><i>If you suspect a release to air, evaluate all populations and sensitive environments within 1/4 mile (including those onsite) as Primary Targets.</i></p>	
<input type="checkbox"/>	<input type="checkbox"/>		<input checked="" type="checkbox"/>
Has a release of hazardous substances to the air been directly observed?			
<input type="checkbox"/>	<input type="checkbox"/>		<input checked="" type="checkbox"/>
Are there any reports of adverse health effects (e.g., headaches, nausea, dizziness) potentially resulting from migration of hazardous substances through the air?			
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Is there any circumstantial evidence of an air release?			
<input type="checkbox"/>	<input checked="" type="checkbox"/>		
Other criteria? _____			
<input type="checkbox"/>	<input checked="" type="checkbox"/>		
SUSPECTED RELEASE?			

Summarize the rationale for suspected release (attach an additional page if necessary):

A release to air is not suspected. Soil and groundwater samples did not contain any significant readings for volatile organics.

SITE SCORE:	$\sqrt{\frac{S_{gw}^2 + S_{sw}^2 + S_{se}^2 + S_a^2}{4}} = 20.59$	

## RECOMMENDATION

--

## SUMMARY

	YES	NO
1. Is there a high possibility of a threat to nearby drinking water wells by migration of hazardous substances in ground water?	=	X
A. If yes, identify the wells recommended for sampling during the SI.		
B. If yes, how many people are served by these threatened wells? _____		
2. Are any of the following suspected to have been exposed to hazardous substances through surface water migration from the site?		
A. Drinking water intake	=	X
B. Fishery	=	X
C. Sensitive environment: wetland, critical habitat, others	=	X
D. If yes, identify the targets recommended for sampling during the SI.		
_____		
3. Do people reside or attend school or day care on or within 200 ft. of any area of suspected contamination?	=	X
4. Are there public health concerns at this site that are not addressed by PA scoring considerations? If yes, explain:	=	X
_____
